

Golden Eagle Mfg. Cam Seal Install

Thank you for your purchase of Golden Eagle Mfg. products for your high performance needs. You now own one of the best products on the market, all 100% made in the *USA!* We are very confident you will be more than pleased with your purchase. If you ever experience any problems, have any concerns or just want to give some advice, we would love to hear from you.

(909) 592 – 4311 or e-mail sales@goldeneagle.com

After removing the old plastic cam seal

(Refer to a shop manual for removal and replacement of the stock cam seal)

1. Prep the new Golden Eagle Mfg. Cam Seal by applying a thin layer of clean engine oil to the o-rings.
2. Place a thin layer of Honda Bond (black silicone sealant) on the cam seal cap edges **ONLY!** Do not put any sealant on the cam seal or o-rings!
3. Put the Golden Eagle Mfg. Cam Seal in place and re-install the cam seal cap torquing the bolts to factory spec.
4. After following the shop manual cam seal install instruction, check for leaks and make sure everything is in order.

Again, we thank you for your purchase and we are always here for your input.
